SUMMARY

Full-stack developer specializing in React, Next.js, and backend systems using Node.js.

Built production-style applications including a blogging platform and a peer-to-peer wallet system with authentication and API design.

Currently focused on building scalable systems using monorepo architecture and modern development tools.

SKILLS

Technical Skills:

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Hono, REST APIs

Databases: PostgreSQL (Prisma ORM) , MongoDB (Mongoose)

Tools & Platforms: Git, GitHub, Vercel, Turborepo

Concepts: Authentication (JWT), Serverless Architecture, API Design, Monorepo Architecture

PROJECTS

MEDIUM-LIKE BLOG WEBSITE ([Live](#) | [Github](#)):

- Built a full-stack blogging platform using React, TypeScript, PostgreSQL, and Prisma
- Implemented authentication and dynamic content rendering for user-generated content
- Designed scalable backend using Hono with serverless deployment architecture
- Deployed on Vercel with optimized performance and modular code structure

PAYTM-LIKE WALLET APPLICATION (MERN Stack): ([Live](#) | [Github](#))

- Developed a full-stack wallet application enabling secure peer-to-peer transactions
 - Implemented JWT-based authentication and protected routes for secure access
 - Designed backend logic for balance management and transaction handling between users
 - Built RESTful APIs using Express and managed data using MongoDB with Mongoose
 - Integrated frontend and backend using Axios for seamless communication
-

EDUCATION

B.Tech in Information Technology

GURU TEGH BAHADUR INSTITUTE OF TECHNOLOGY , GGSIPU

2024-Present

Hobbies & Interests

- Strength training (consistent gym routine)
- Building and experimenting with full-stack projects
